

Reaction beam momentum vs target thickness

Executed: 2026-10-02 18:25:11

Macro: PlotReactionBeamMomentumVsTargetThickness.cc

Thickness: all recorded target/frame volumes

Thickness unit: g/cm^2

Reaction momentum: BEAM branch on reaction event

Initial momentum: preceding first-generator beam event

Entries: 10000 Reaction: 0 Filled: 0

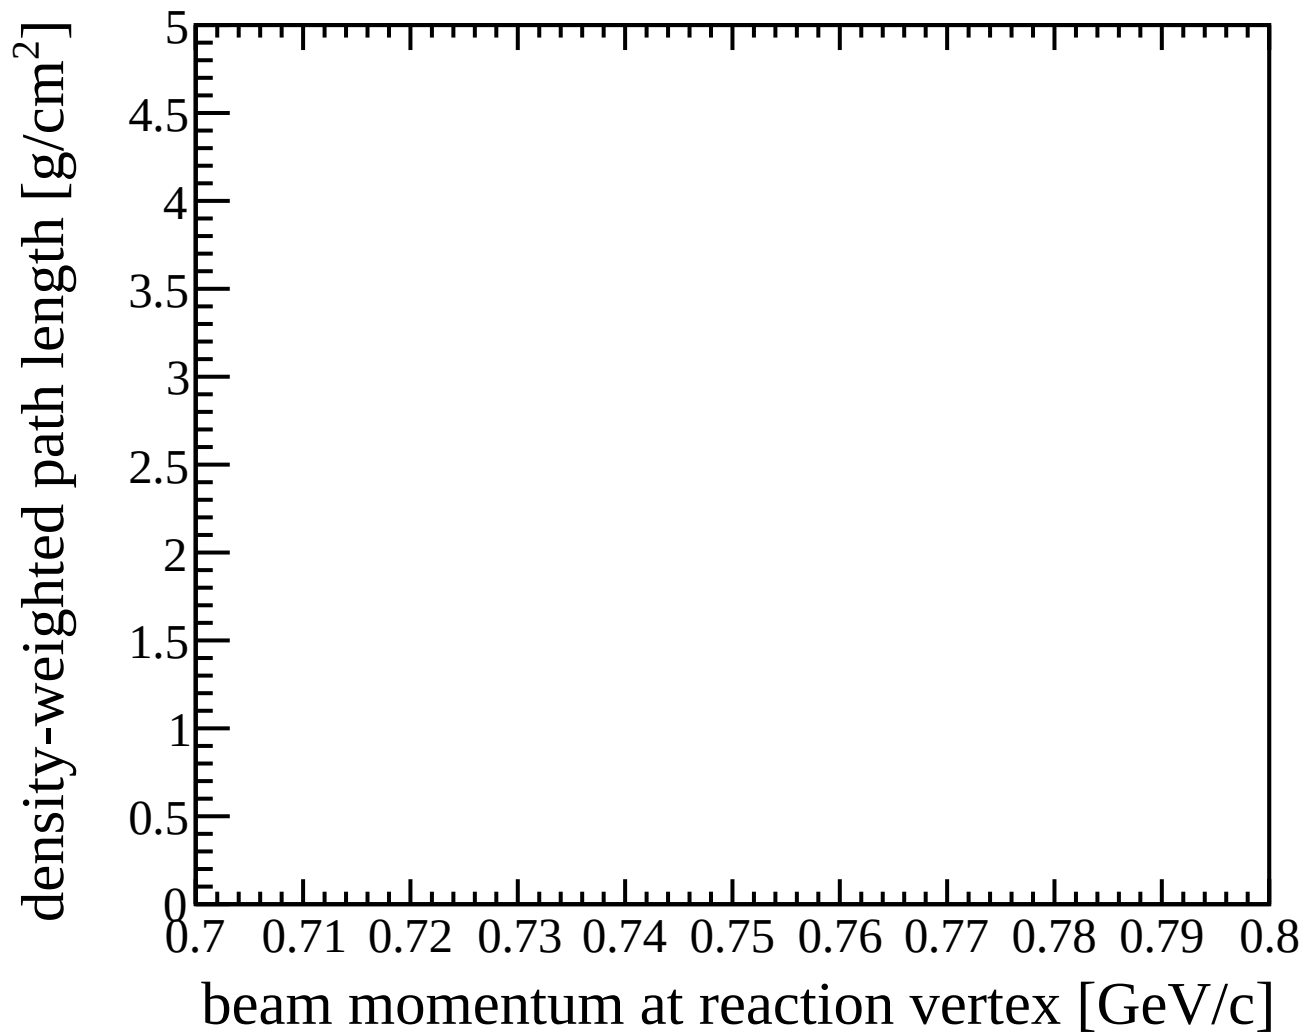

Missing initial: 0 Path-size mismatch: 0

Max path segments: 0 Max thickness: 0 g/cm^2 Max length: 0 mm

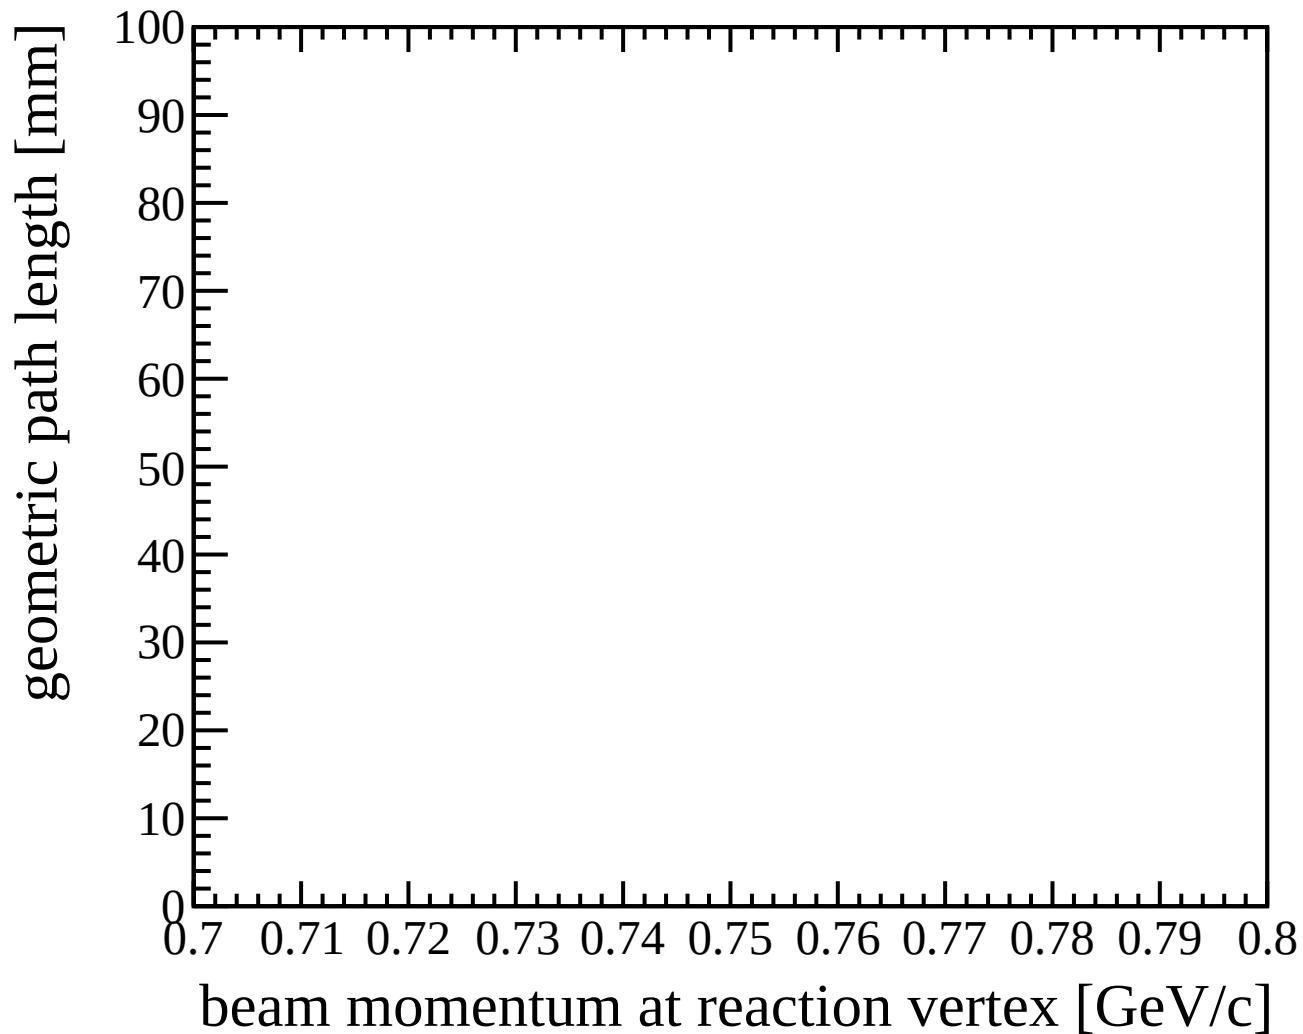

Input files:

/home/had/haein/simul-data/e72-k18ana/mom-735/e72_tpcon-735_beam_735.root

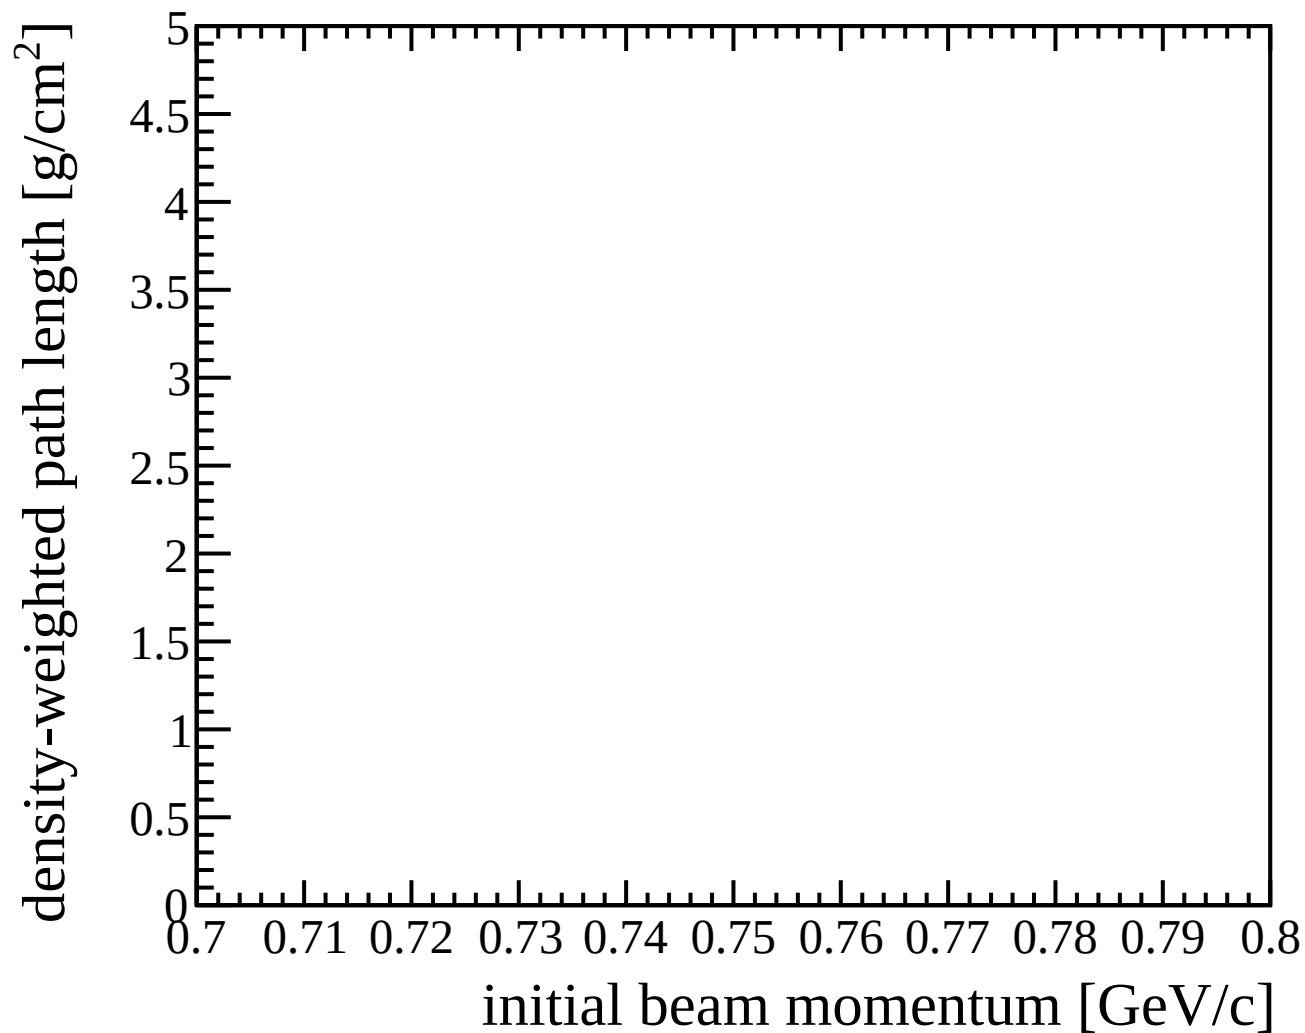

Reaction-vertex beam momentum vs target thickness

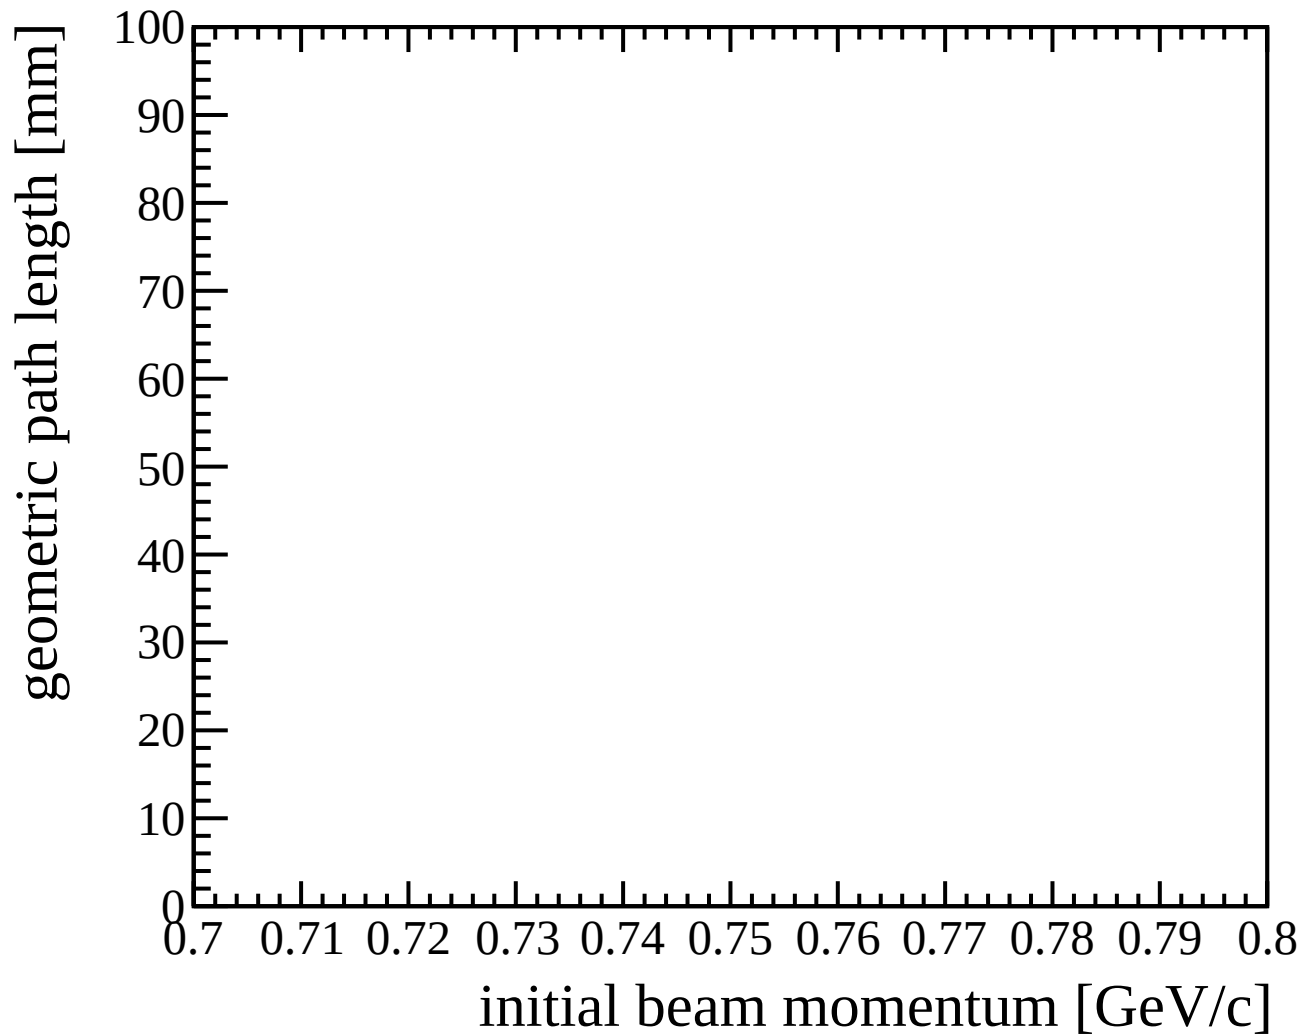

Reaction-vertex beam momentum vs geometric path length

Initial beam momentum vs target thickness

Initial beam momentum vs geometric path length

Initial beam momentum vs total TGT path length
