

Λ missing mass: production-vertex beam momentum

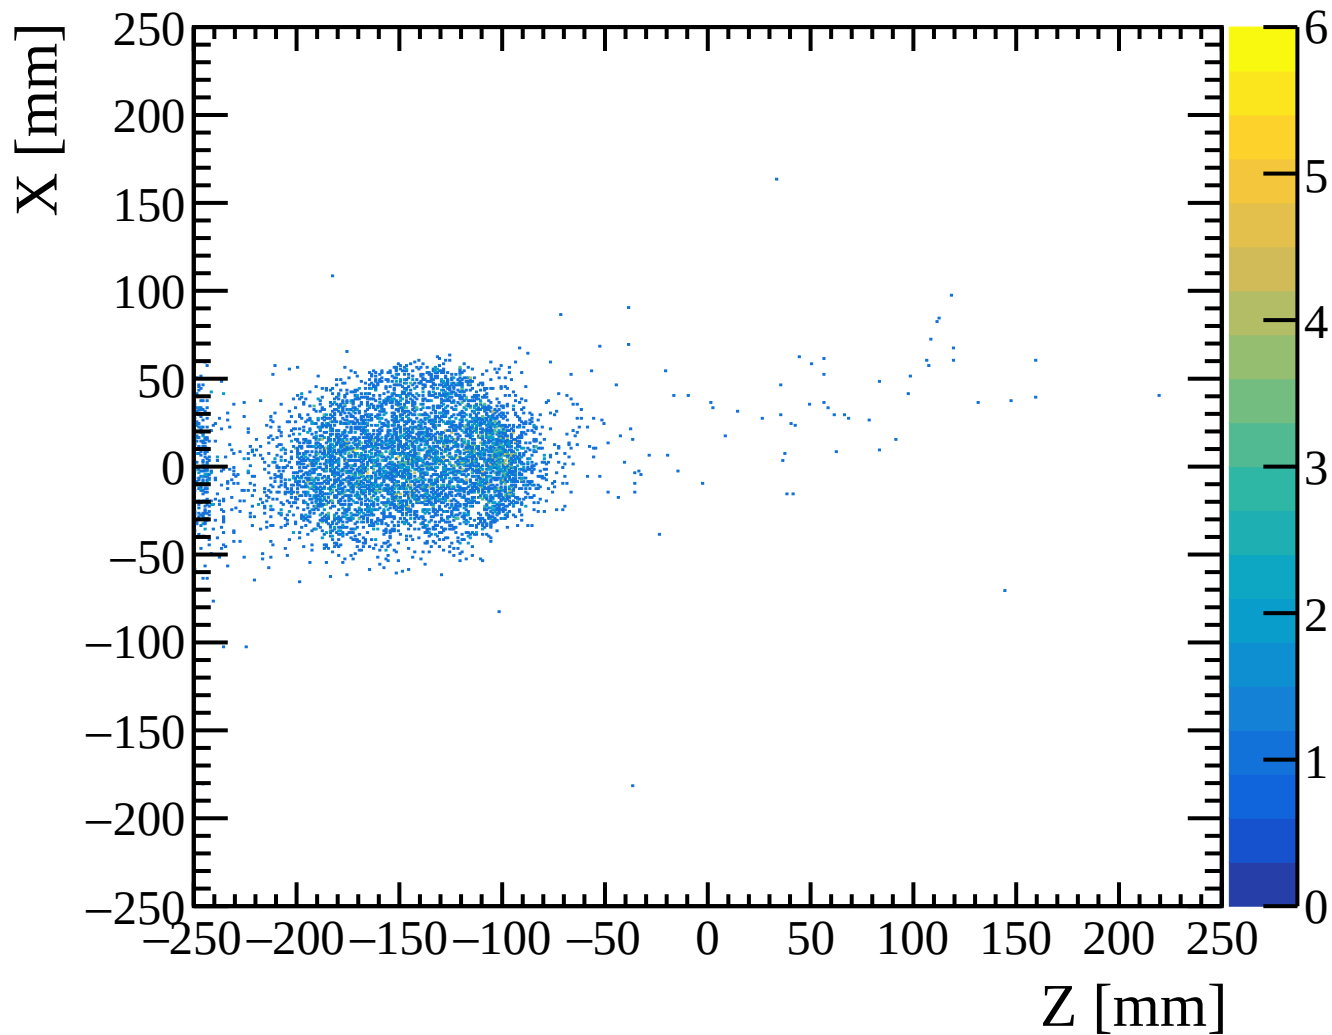

Λ missing mass squared: production-vertex beam momentum

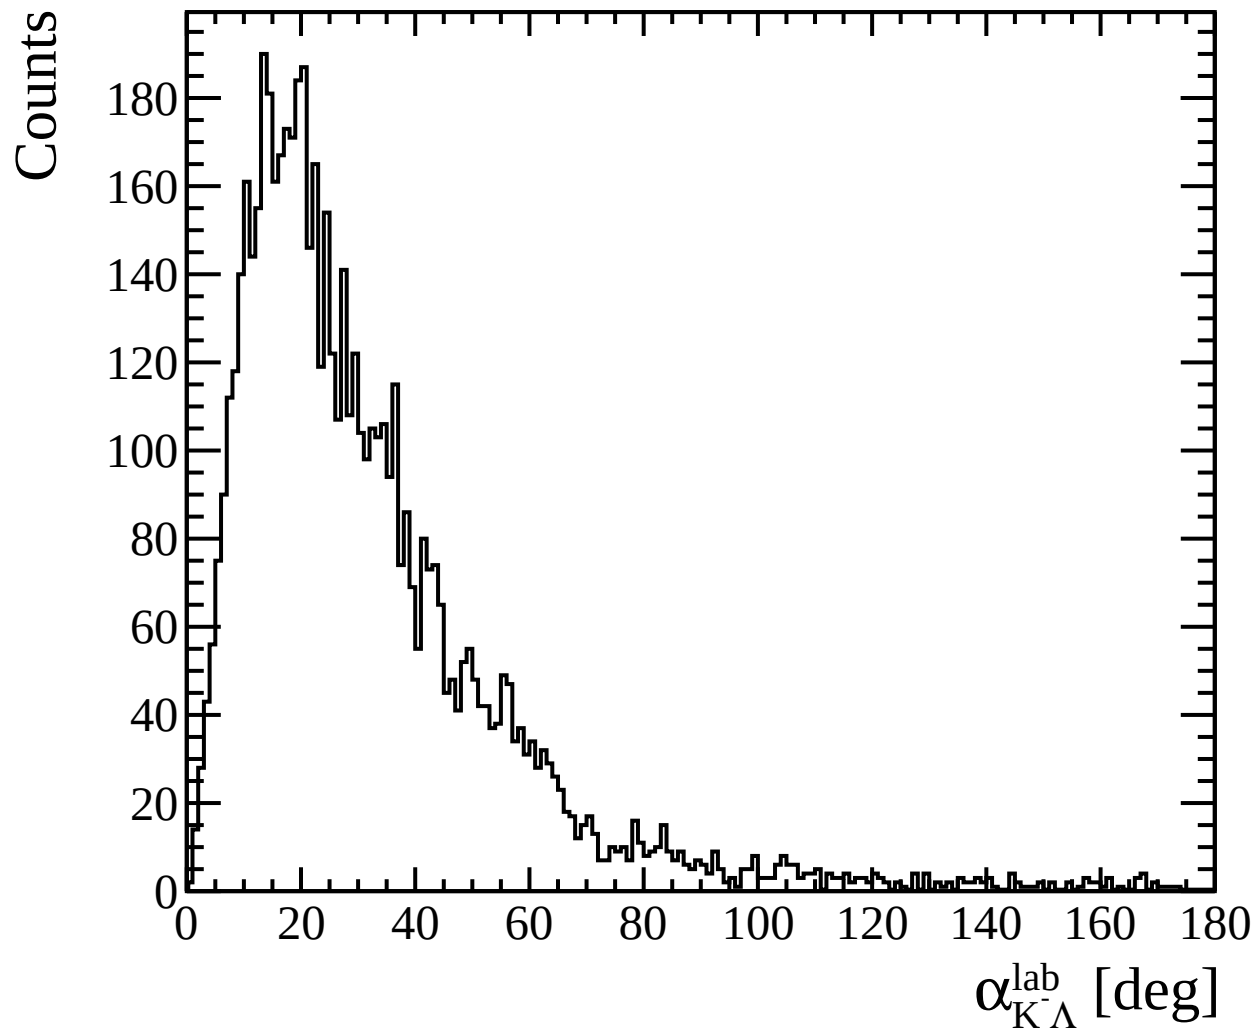

K18 RK beam-- Λ production closest approach

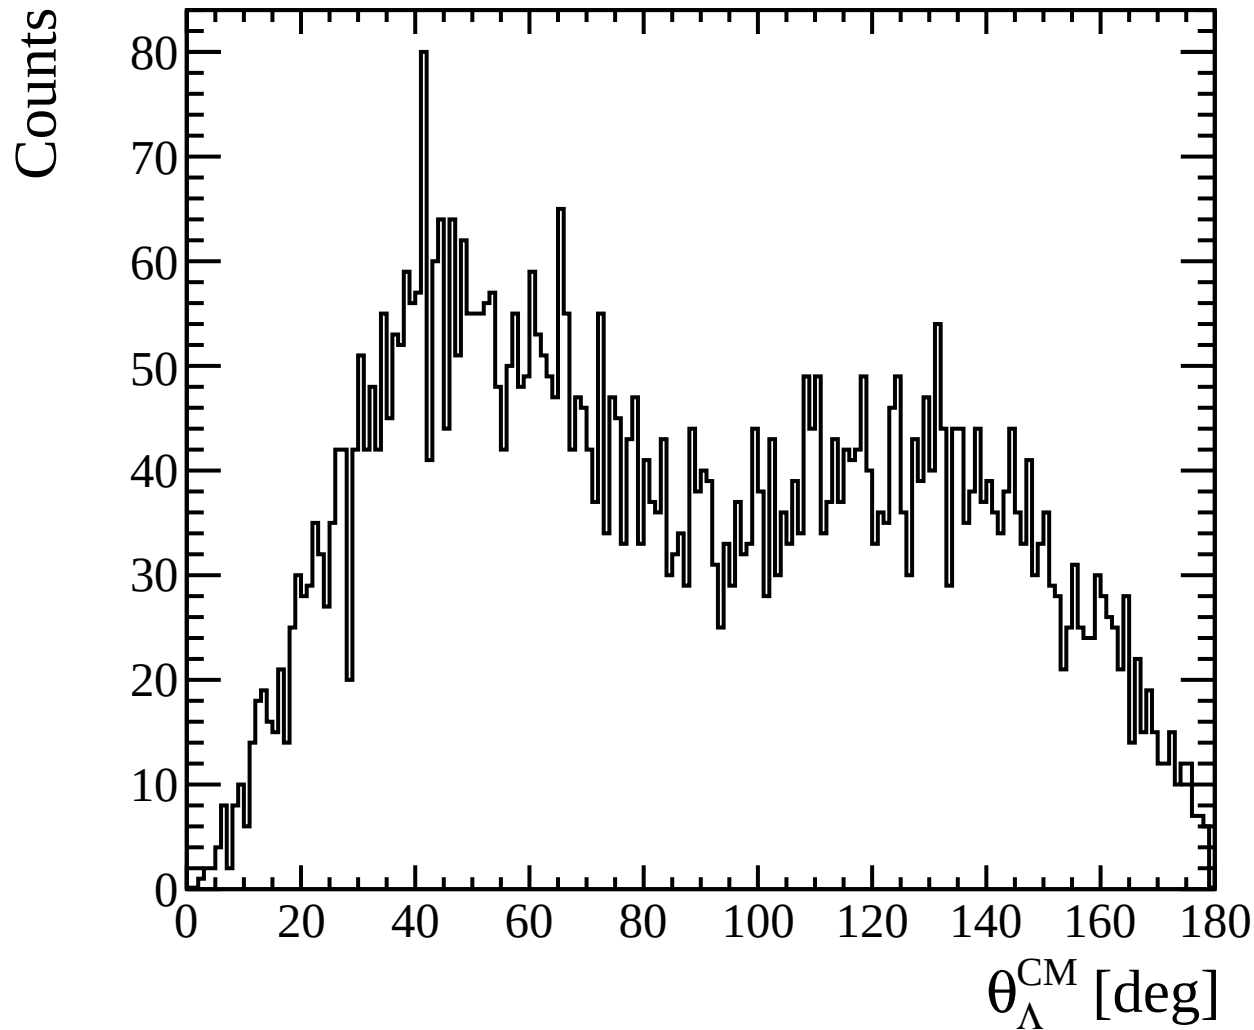

Reconstructed Λ production vertex

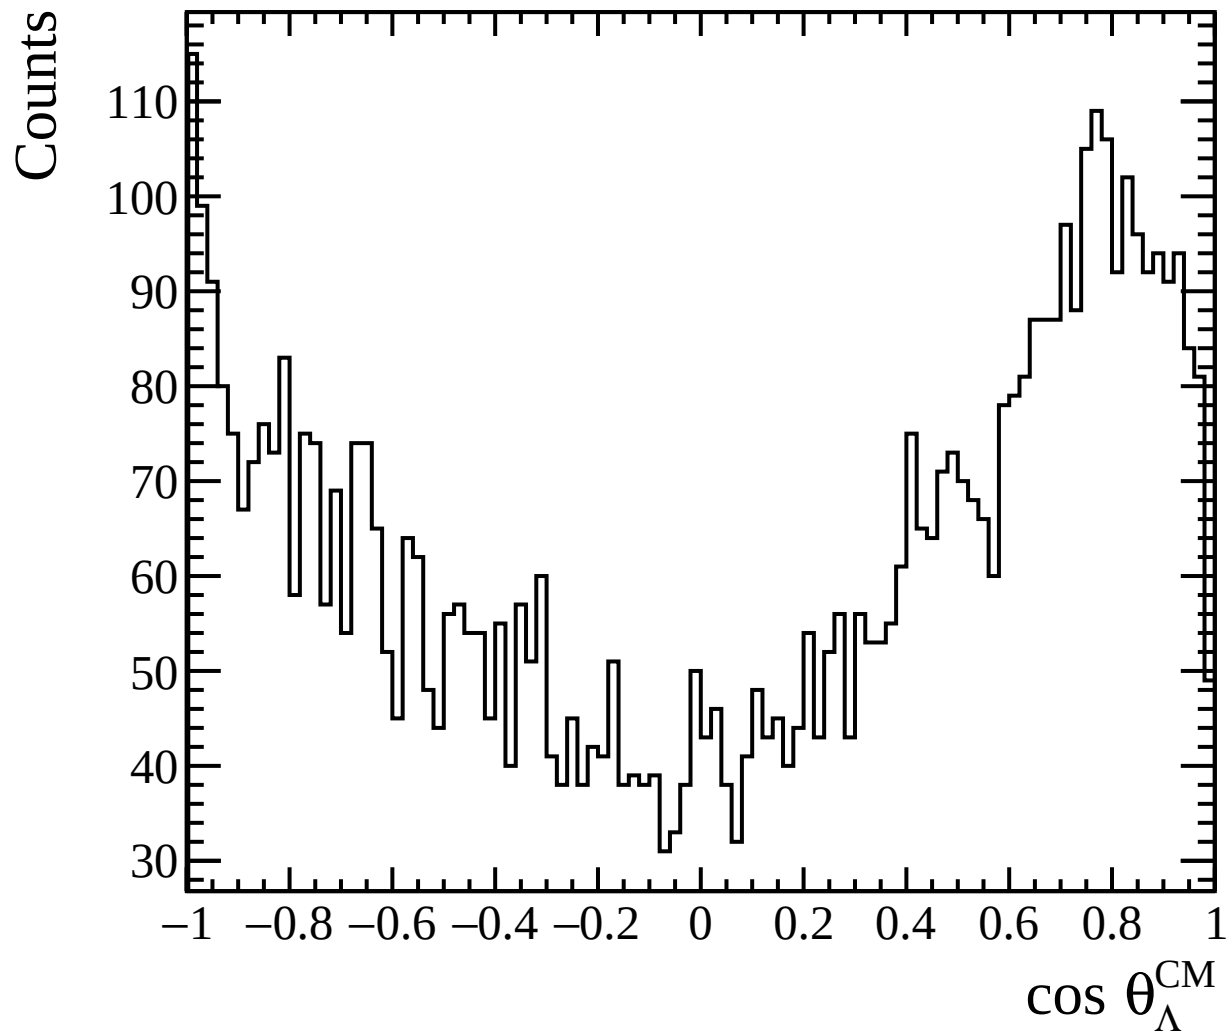

$K^- \Lambda$ opening angle (lab)

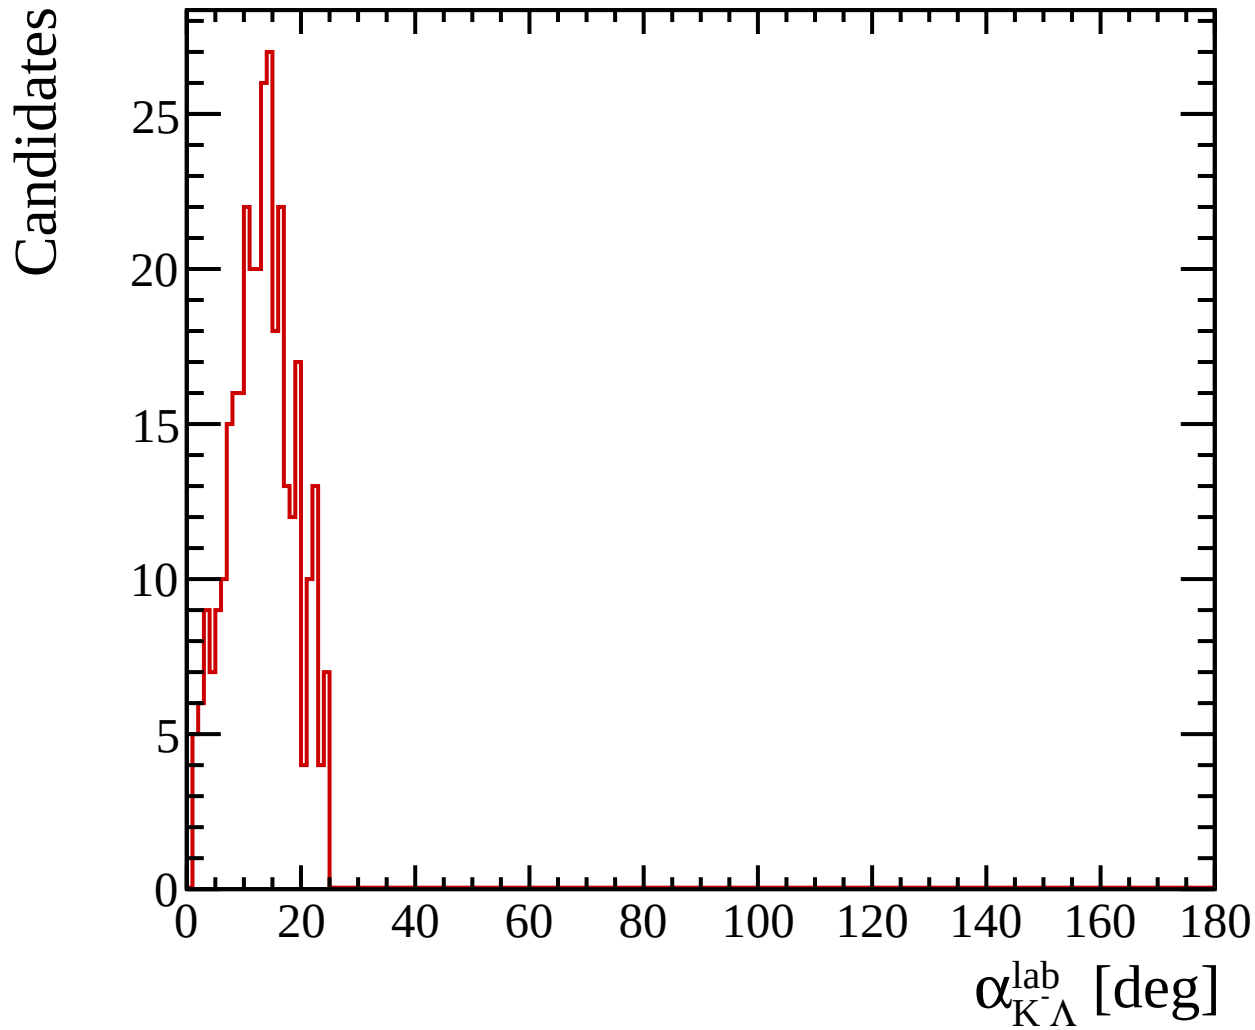

Λ production angle in K^-p CM

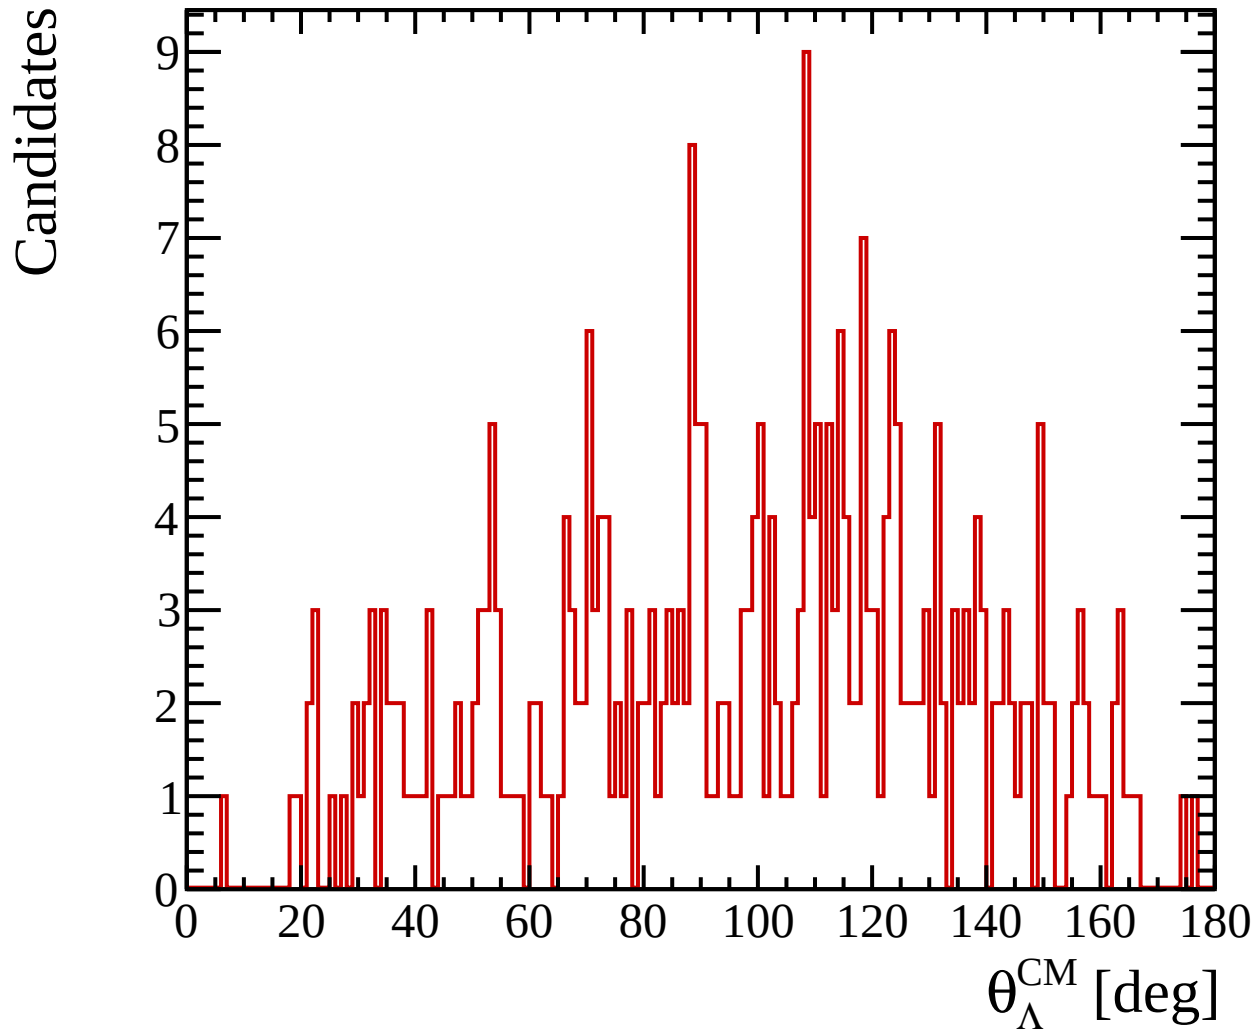

Λ production angle in K^-p CM

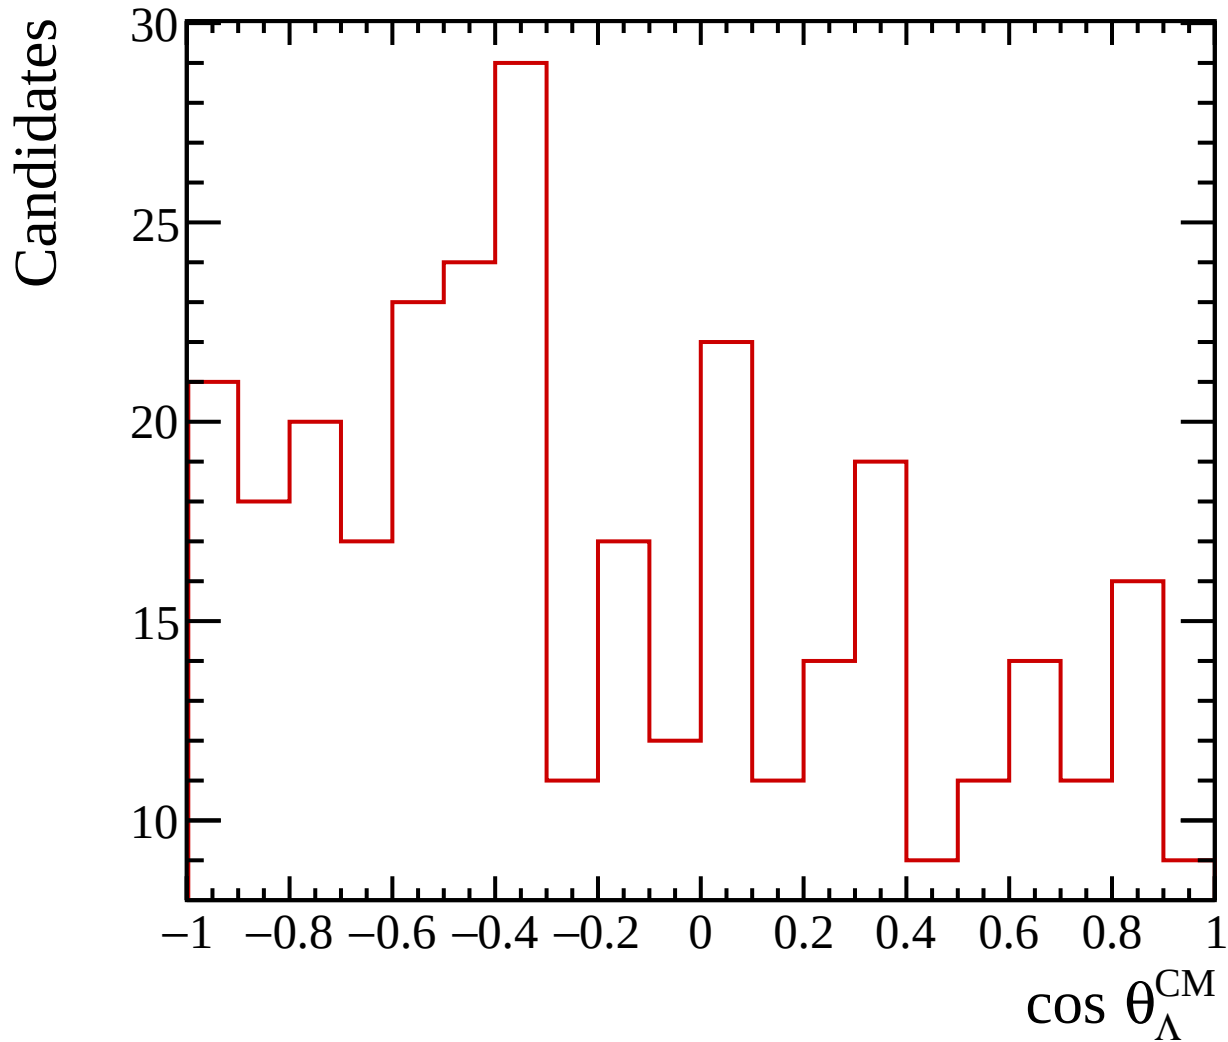

Selected Λ production angle ($M_X > 0.50$, LH2 inside)

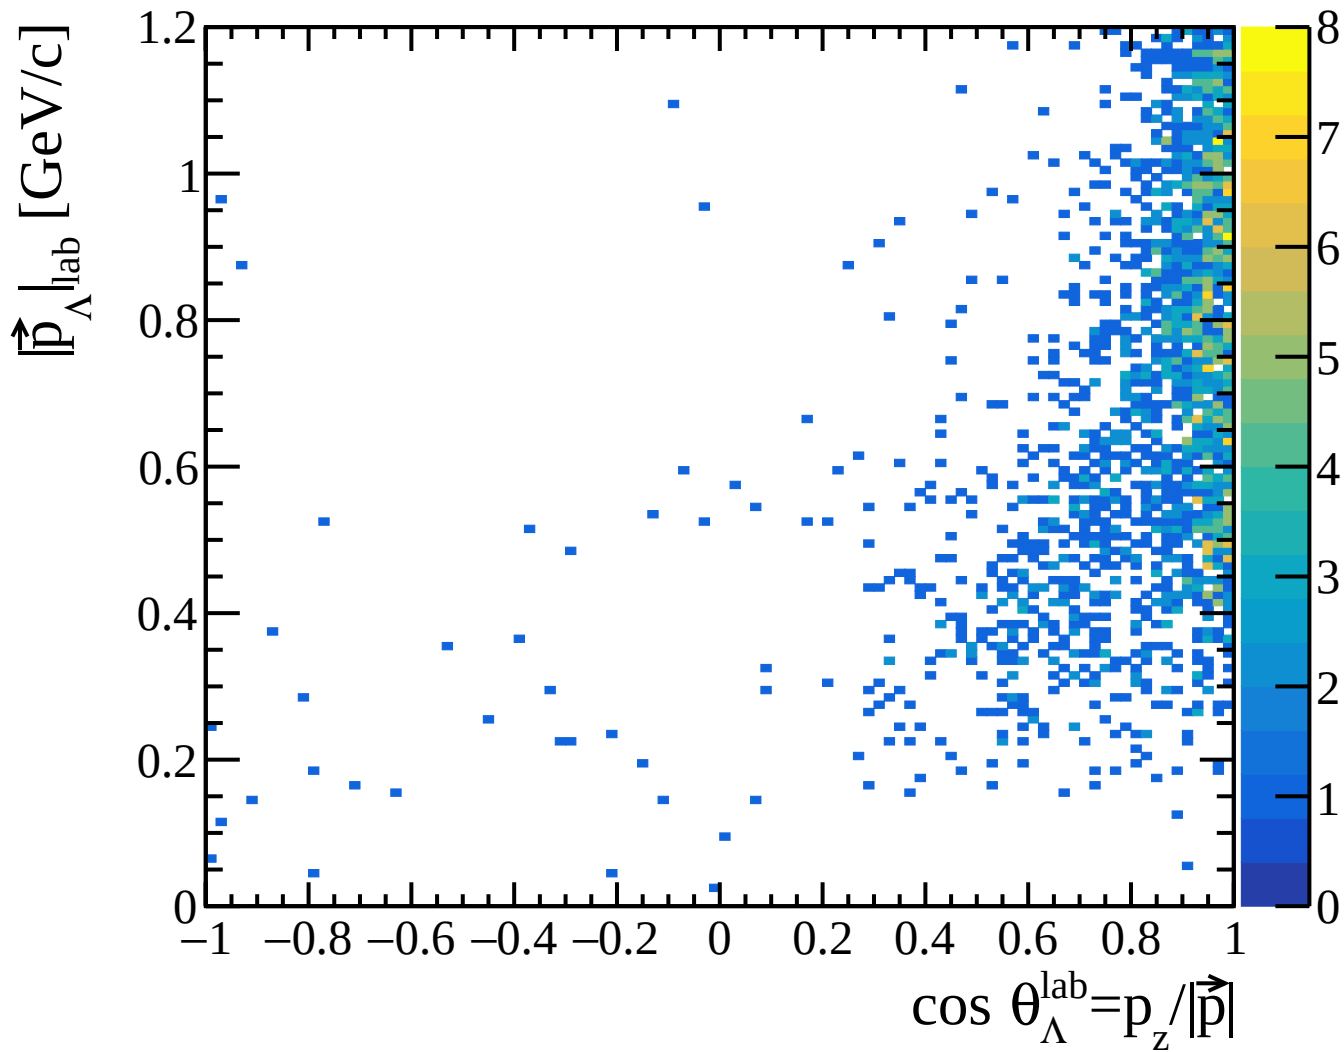

Selected Λ production angle ($M_X > 0.50$, LH2 inside)

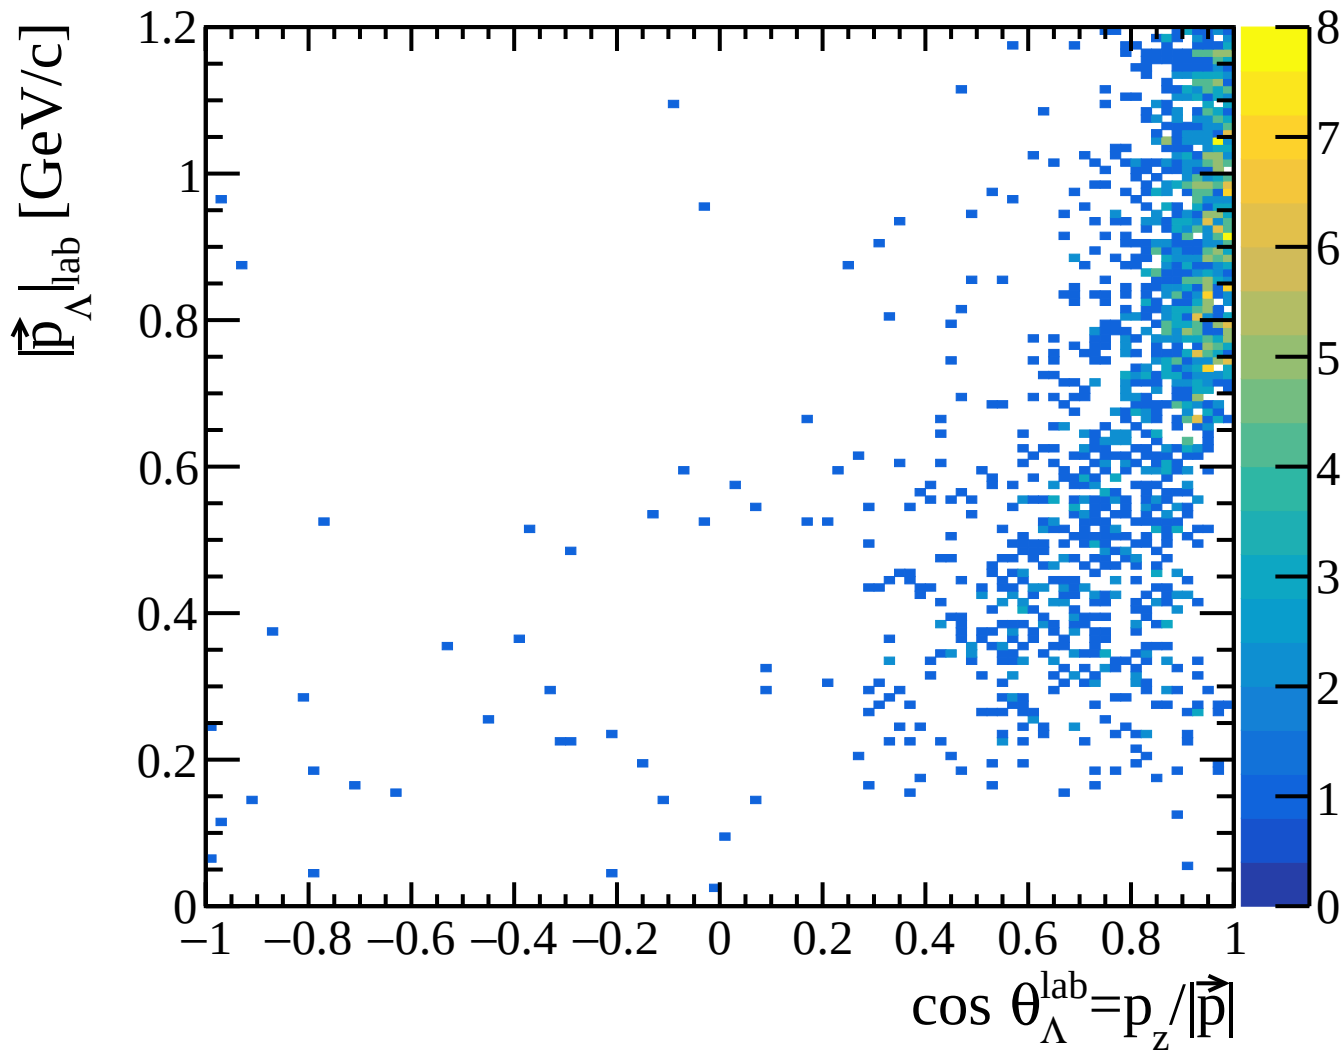

Selected Λ production angle ($M_X > 0.50$, LH2 inside)

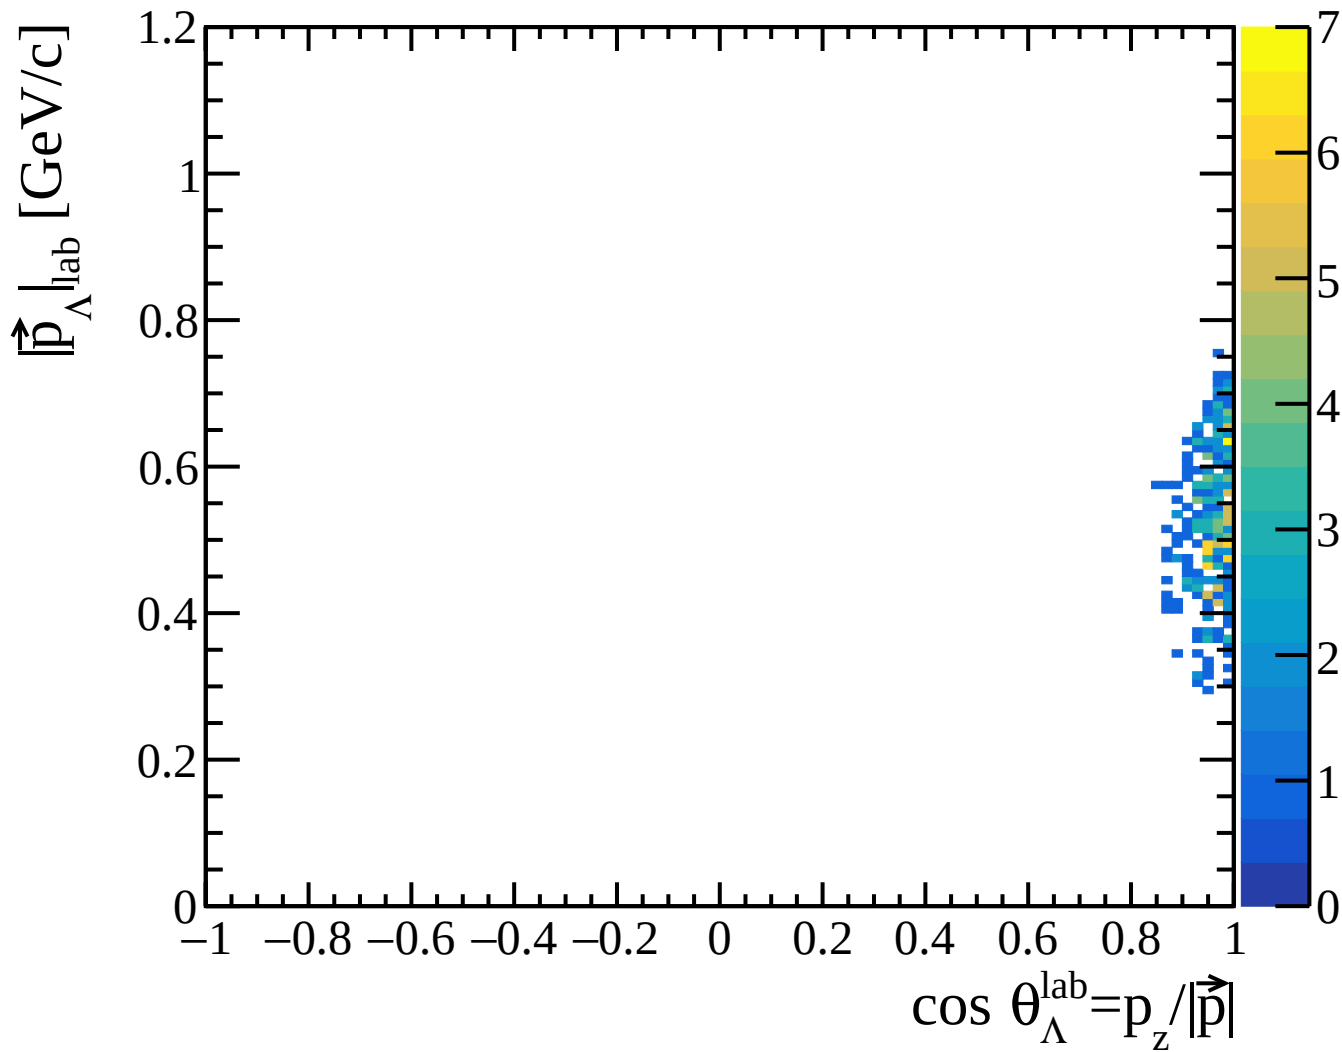

Selected Λ : lab $\cos\theta$ vs lab momentum (LH2 inside, all M_x)

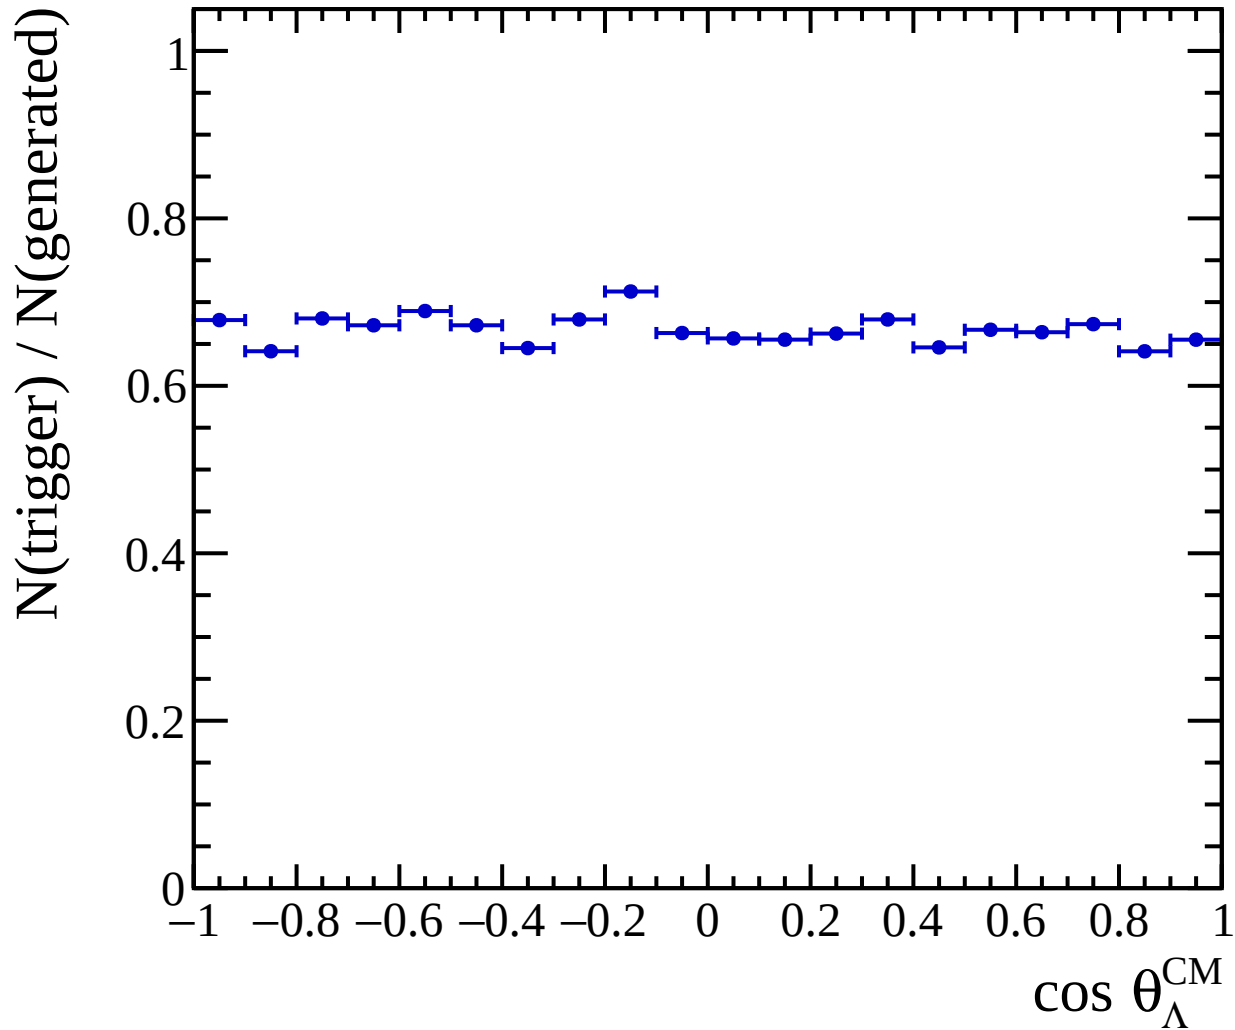

Selected Λ : lab $\cos\theta$ vs lab momentum (LH2 inside, $M_x \leq 0.50 \text{ GeV}/c^2$)

Selected Λ : lab $\cos\theta$ vs lab momentum (LH2 inside, $M_X > 0.50 \text{ GeV}/c^2$)

Trigger acceptance for generated $\Lambda\eta$

Selected Λ production angle, trigger-acceptance corrected ($M_X > 0.50$, LH2 inside)
